Emissions_dashboard

United States Emissionns BreakDown

This Data Is Collected By The EPA(Environment Protection Agecny)2023

Total population in US Country

31.86Cr

Total Emissions by US Country

56.25Cr

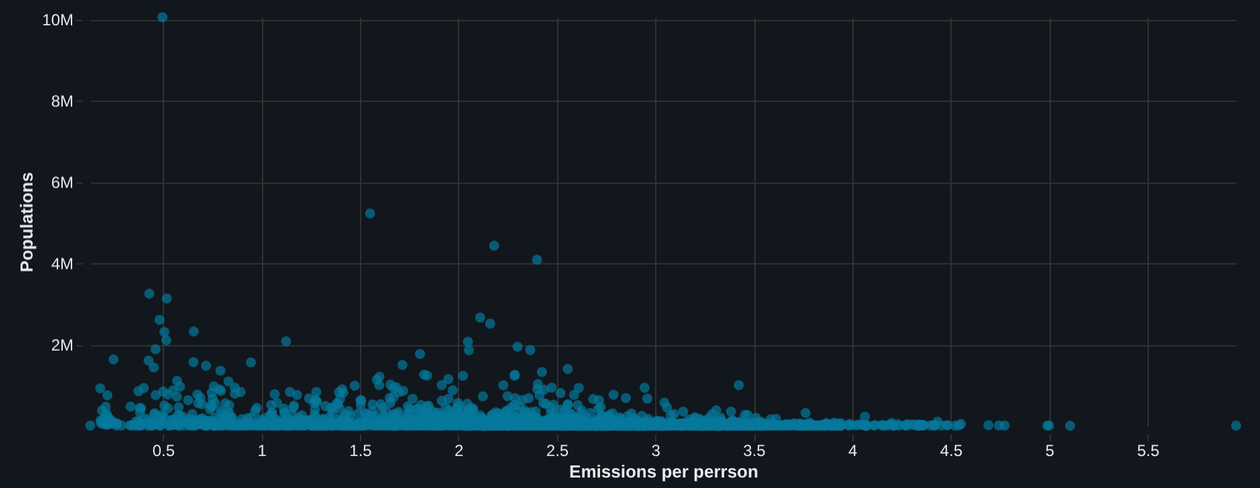

Emission Per US Person

1.77

Emissions for continental US

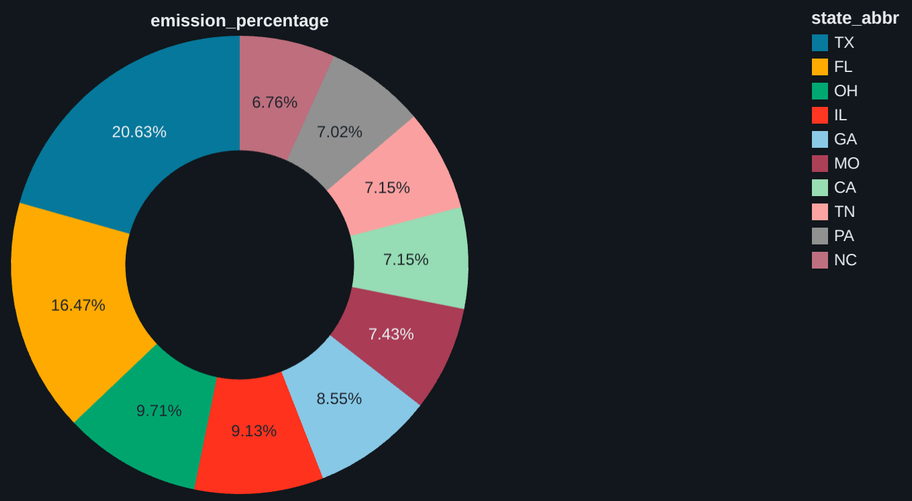

EMISSION VS POPULAITON
Higher population tenda to have lower emission per person

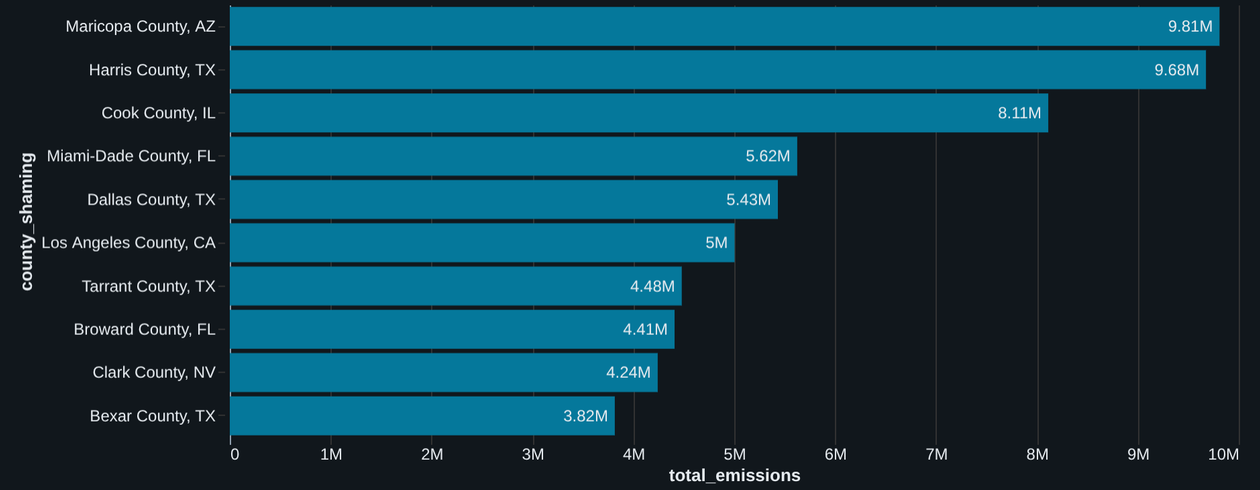

Total_Emissions Min Max

These 10 States account for 51% of all emissions in the US

total Emission by mTOn by CO2e

Dashboard Overview

This dashboard analyzes greenhouse gas emissions across U.S. counties using Databricks SQL. Interactive visualizations highlight emission distribution, population impact, geographic patterns, and top-emitting regions, enabling data-driven environmental insights.
